

Active Ageing Index | 2018

Analytical Report
October 2019

Contents

Executive summary	x
Introduction	1
Part 1: Active Ageing in European Union	6
1.1 2018 AAI in the EU countries	6
1.1.1 Clustering of countries	7
1.1.2 Gender gap in Active Ageing	13
1.2 Subnational AAI	20
Part 2: Where are we heading: progress over eight years	28
2.1 AAI trends in 2008-2016	28
2.1.1 Overall trends	28
2.1.2 Employment	31
2.1.3 Social participation	33
2.1.4 Independent, healthy and secure living	35
2.1.5 Capacity and enabling environment for active ageing	37
2.1.6 Gender gap	38
2.2 Inequalities in active ageing	41
2.2.1 Situation in the European Union	41
2.2.2 Inequalities in selected countries	43
Part 3: Evidence base for policymaking	48
3.1 Linking AAI results with existing policy frameworks	48
3.2 Challenges highlighted by the 2018 AAI and recommendations by the European Semester and MIPAA/RIS 2012-2017	49
3.3 Evidence-based support for policy interventions at country level according to the 22 AAI indicators	54
Part 4: Conclusions and challenges for the future	60
4.1 How this study could be expanded	60
4.2 A cautionary tale	61
References	63
Annex	65

List of figures

Figure 1: Population pyramids of the UNECE region, 2000, 2015, 2030 (in per cent of the total population)	1
Figure 2: The Active Ageing Index (AAI)	4
Figure 3: Map of country clusters.	8
Figure 4: Gender gap in the overall 2018 AAI score (expressed as a difference between women’s and men’s scores), by country and cluster.	18
Figure 5: Gender gap in the 2018 AAI score for the domain “Employment” (expressed as a difference between women’s and men’s scores), by country and cluster.	16
Figure 6: Gender gap in the AAI 2018 score for the domain “Social participation” (expressed as a difference between women’s and men’s average scores), by country and cluster.	17
Figure 7: Gender gap in the 2018 AAI score for the domain “Independent living” (expressed as a difference between women’s and men’s scores), by country and cluster.	18
Figure 8: Gender gap in the 2018 AAI score for the domain “Capacity and enabling environment” (expressed as a difference between women’s and men’s scores), by country and cluster.	19
Figure 9: Overall AAI in Italy, 2016	20
Figure 10: Overall AAI in Italy, gender gap 2016	21
Figure 11: Overall AAI in Poland, by voivodships, 2013 (2011) and 2015	22
Figure 12: Overall AAI in 30 German territories (2012-2015 data)	23
Figure 13: Overall AAI in 30 German territories, gender gap (2012-2015 data)	25
Figure 14: Overall AAI in Biscay, trend 2014-2018.	27
Figure 15: Evolution of the overall AAI score in the EU country clusters between 2008 and 2016	29
Figure 16: Change in the AAI score in the EU countries between 2008 and 2016 (colours reflecting clusters of membership), overall and by gender	30
Figure 17: Evolution of the AAI domain-specific score for “Employment” in the EU between 2008 and 2016, by country clusters	31
Figure 18: Change in the AAI domain-specific score for “Employment” in the EU countries between 2008 and 2016 (colours reflecting clusters of membership), overall and by gender.	32
Figure 19: Evolution of the AAI domain-specific score for “Social participation” in the EU between 2008 and 2016, by country cluster	33

Figure 20: Change in the domain-specific score for “Social participation” in the EU countries between 2008 and 2016 (colours reflecting clusters of membership), overall and by gender	34
Figure 21: Evolution of the AAI domain-specific score for “Independent, healthy and secure living” in the EU between 2008 and 2016, by country cluster . .	35
Figure 22: Change in the AAI domain-specific score for “Independent, healthy and secure living” in the EU countries between 2008 and 2016 (colours reflecting clusters of membership), overall and by gender	36
Figure 23: Evolution of the AAI domain-specific score for “Capacity and enabling environment” in the EU between 2008 and 2016, by country cluster.	37
Figure 24: Change in the AAI domain-specific score for “Capacity and enabling environment” in the EU countries between 2008 and 2016 (colours reflecting clusters of membership), overall and by gender.	38
Figure 25: Overall AAI in the EU countries: gender gap in 2016, and change between 2008 and 2016 by gender.	40
Figure 26: 2018 AAI scores (overall) and GDP per capita in the EU28	41
Figure 27: AAI scores (overall) and income inequality measured by Gini index in EU28, 2018	42
Figure 28: AAI scores (overall) and life satisfaction among 65+ in EU28, 2018.	43

List of tables

Table 1:	2018 AAI for EU28 countries (overall and by domain).	6
Table 2:	2018 AAI by country clusters, overall and domain-specific average scores within cluster	8
Table 3:	Difference between the average country clusters' overall 2018 AAI and domain-specific scores and the EU average (expressed as a percentage of the latter)	10
Table 4:	Countries by clusters: 2018 AAI domain-specific scores and difference from EU-average (expressed as a percentage of the latter)	11
Table 5:	2018 AAI overall and domain-specific gender gap by country and cluster (expressed as difference between women's and men's AAI scores).	14
Table 6:	AAI overall and by domain in Italy, 2016	20
Table 7:	AAI overall and by domain, gender gap in Italy.	21
Table 8:	AAI overall and by domain in 30 German territories, 2012-2015 data	23
Table 9:	AAI overall and by domain, gender gap in 30 German territories, 2012-2015 data.	25
Table 10:	AAI overall and by domain in Biscay and gender gap, in 2014, 2016 and 2018.	27
Table 11:	Evolution of the overall AAI score in the EU countries between 2008 and 2016, by cluster.	28
Table 12:	Evolution of the gender gap in the overall AAI score in the EU countries between 2008 and 2016	38
Table 13:	Correspondence between AAI domains and MIPAA/RIS commitments.	49
Table 14:	Comparison of the challenges highlighted by the AAI, the 2018 ES-CSRs and the 2017 MIPAA/RIS national reports, by cluster, country and AAI domain.	50
Table 15:	2018 AAI domain-specific scores for four selected countries belonging to different clusters and deviation from EU-average (expressed as a percentage of the latter)	56
Table 16:	Deviation from the EU average of the 2018 AAI values for all 22 indicators in four selected countries belonging to different clusters (expressed as % deviation).	58
Table 17:	Deviation from the EU average of the 2018 AAI values for all 22 indicators in the countries belonging to cluster 4, by country (expressed in absolute points).	59
Table A1:	AAI – indicators, sources and variables	65
Table A2:	2018 AAI by country cluster, overall and domain-specific average scores within cluster (and mean standard deviation)	67

Table A3: Percentage of people aged 55 years and older undertaking physical exercise or sport almost every day (AAI indicator 3.1) in the period 2008-2016, by cluster	67
Table A4: Percentage of people aged 55 years and older undertaking physical exercise or sport almost every day (AAI indicator 3.1) in the period 2008-2016, by country	67
Table A5: Percentage of population aged 55+ who report no unmet need for medical and dental examination (AAI indicator 3.2) in the period 2008-2016, by cluster	68
Table A6: Percentage of population aged 55+ who report no unmet need for medical and dental examination (AAI indicator 3.2) in the period 2008-2016, by country	69
Table A7: Percentage of persons aged 75 and older living in single or couple households (AAI indicator 3.3) in the period 2008-2016, by cluster	70
Table A8: Percentage of persons aged 75 and older living in single or couple households (AAI indicator 3.3) in the period 2008-2016, by country	70
Table A9: Ratio of the median equivalised disposable income of people aged 65+ to the median equivalised disposable income of those aged below 65 (AAI indicator 3.4) in the period 2008-2016, by cluster	71
Table A10: Ratio of the median equivalised disposable income of people aged 65+ to the median equivalised disposable income of those aged below 65 (AAI indicator 3.4) in the period 2008-2016, by country	71
Table A11: Percentage of people aged 65+ who are not at the risk of poverty using 50% of the national median equivalised disposable income as the poverty threshold (AAI indicator 3.5) in the period 2008-2016, by cluster	72
Table A12: Percentage of people aged 65+ who are not at the risk of poverty using 50% of the national median equivalised disposable income as the poverty threshold (AAI indicator 3.5) in the period 2008-2016, by country	72
Table A13: Percentage of people aged 65+ not severely materially deprived (AAI indicator 3.6) in the period 2008-2016, by cluster	73
Table A14: Percentage of people aged 65+ not severely materially deprived (AAI indicator 3.6) in the period 2008-2016, by country	74
Table A15: Percentage of people aged 55 years and older who are feeling safe to walk after dark in their local area (AAI indicator 3.7) in the period 2008-2016, by cluster	75
Table A16: Percentage of people aged 55 years and older who are feeling safe to walk after dark in their local area (AAI indicator 3.7) in the period 2008-2016, by country	75

Table A17: Percentage of persons aged 55-74 who received education or training in the 4 weeks preceding the survey (AAI indicator 3.8) in the period 2008-2016, by cluster	76
Table A18: Percentage of older persons aged 55-74 who received education or training in the 4 weeks preceding the survey (AAI indicator 3.8) in the period 2008-2016, by country	76
Table A19: Values and changes 2008-2016 in the domain-3 indicators, by gender and by country (only for countries reporting a more negative trend for women than for men in the AAI domain of Independent, healthy and secure living in the considered period)	78
Table A20: Values and changes 2008-2016 in the domain-3 indicators, by gender, Lithuania	80
