

WIPO Patent Drafting Manual

Second edition

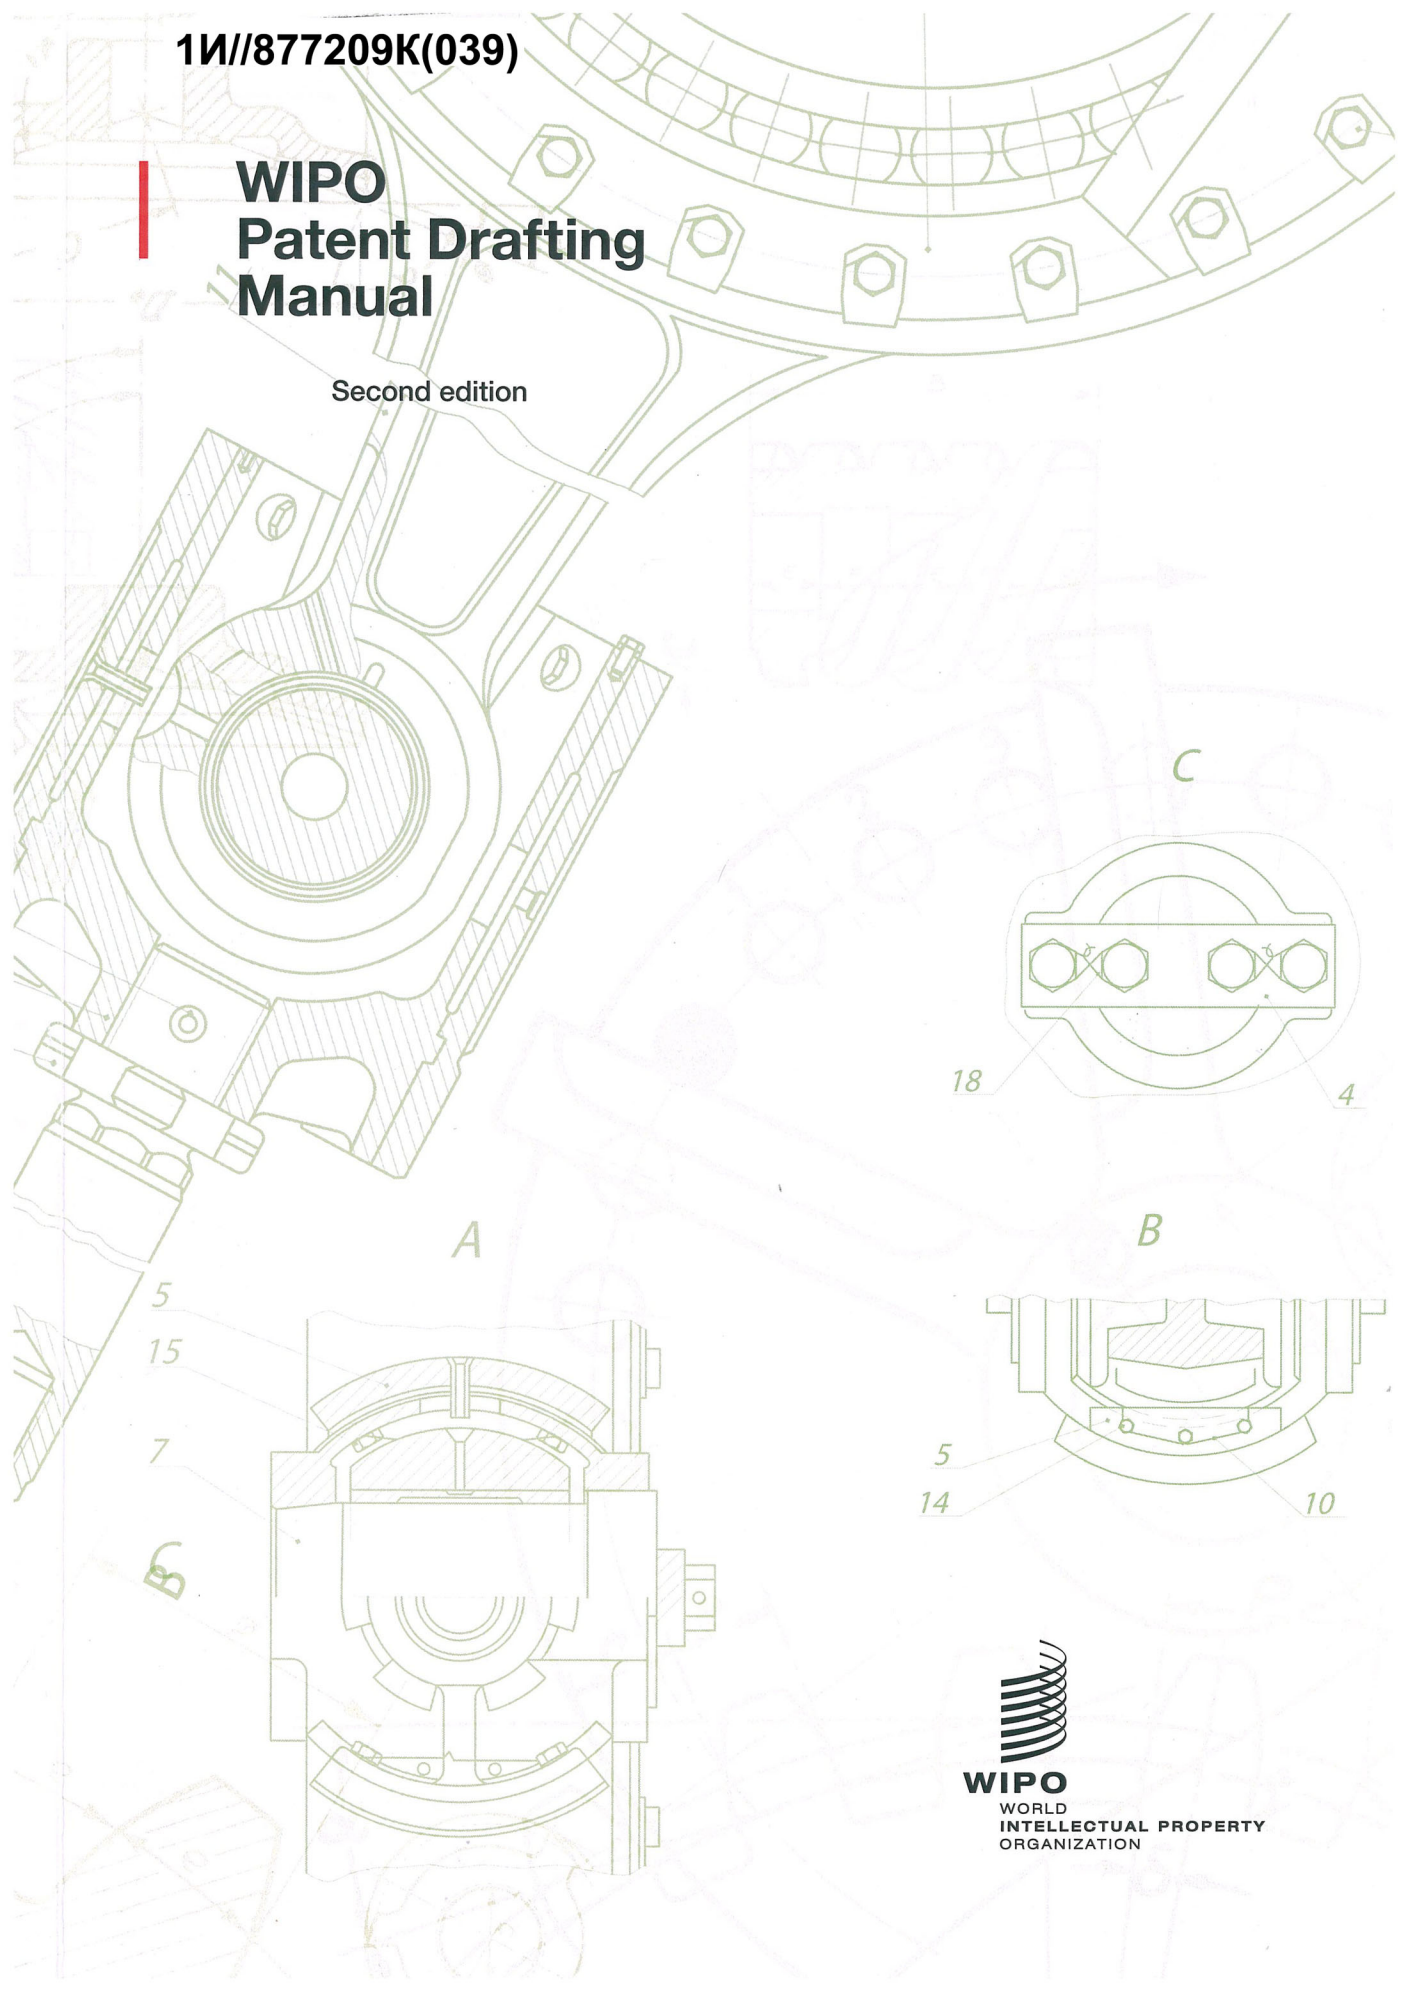

Table of contents

Foreword	6	Module IV	35
Acknowledgments	7	Fundamentals of claim drafting	35
Module I		1. Theory of the patent claim	36
Intellectual property: an introduction	8	1.1 Overview: inventions, embodiments and claims	36
1. Intellectual property types	9	1.2 Broad and narrow claims	37
2. More patent basics	9	1.3 Patent protection and infringement: all-elements rule	37
Module II		2. Patent claim format	38
Patents	11	2.1 Parts of a claim	38
1. Detailed overview of patents	12	2.2 Grammar of a claim and other detail	41
1.1 What is a patent?	12	2.3 Two-part claims or improvement claims	44
1.2 What can be the subject of a patent?	13	2.4 Alternative elements and Markush claims	45
1.3 Why are patents important?	16	2.5 Functional elements and means-plus-function claims	47
2. Legal requirements for patentability	18	3. Claim sets	48
2.1 Novelty	18	3.1 Independent claims	48
2.2 Inventive step/nonobviousness	19	3.2 Dependent claims	50
2.3 Industrial application/utility	21	3.3 Multiple dependent claims	53
2.4 Patentable subject matter	22	3.4 Claims referring to features of another claim	56
2.5 Disclosure requirement	23	3.5 Claim sets based on set theory	57
Module III		3.6 Schematic example of drafting a set of claims	60
Patent application preparation	27	Module V	66
1. Preparing patent applications	28	Types of claim	66
1.1 Obtaining invention disclosures from inventors	30	1. Basic types of claim	67
1.2 Identifying patentable inventions	31	1.1 Product claims	67
1.3 Understanding the invention (core inventive concept)	32	1.2 Process (or method) claims	68
1.4 Inventorship	32	1.3 Preamble with the purposive expression “for”	68
2. Typical parts of the patent application	33	2. Specific types of claim	69
2.1 Request	33	2.1 Product-by-process claims	69
2.2 Description	33	2.2 Parameter claims	70
2.3 Claims	33	2.3 General use claims	71
2.4 Drawings	34	2.4 Medical indication claims	71
2.5 Abstract	34	2.5 Composition claims	73
2.6 Application format	34	2.6 Biotechnology claims	73
		2.7 Computer-implemented invention claims	74

**Module VI
Patent claim design 76**

1. Prepare the claims first	77
2. Broad and narrow claims	77
3. Clarity, claim word choice and inconsistencies	79
3.1 Defining terms	79
3.2 Distinguishing elements	80
3.3 Relative terms	80
3.4 Uncertainty	81
3.5 "In"	81
3.6 Inconsistency	82
3.7 Putting this into practice	82
4. Claim variations and modifications of the invention	83
5. Avoiding unnecessary limitations	84
6. Negative limitations and disclaimers	84
7. Claims and competing products	85
8. Claims must overcome prior art	85
9. Using multiple claim types for the same invention	85
10. Ensuring that the description supports the claims	86
11. Unity of invention	87
12. Claim point of view	88
13. Narrowing a patent claim during prosecution	91
14. Exclusions from patentability	92
15. Requirement for industrial applicability	93
16. "Reading on" a patent claim	93
17. Claim construction in the courts	93

**Module VII
Drafting a description, drawings and an abstract 96**

1. Key audiences of patent applications	97
2. Order in which to draft a patent application	97
3. Drafting parts of a description	98
3.1 Title of invention	98
3.2 Technical field	98
3.3 Background art	98
3.4 Summary of invention	100
3.5 Brief description of drawings	101
3.6 Description of embodiments	101
4. Drafting drawings	105
4.1 Types of drawing	105
4.2 Reference indicators	105
4.3 Level of detail	106
4.4 Drawings provided by the inventor	106
5. Drafting an abstract	106

**Module VIII
Filing patent applications 108**

1. Domestic/priority filings	110
2. Foreign filings	110
3. Patent office procedures and fees	112
3.1 Patent office procedures	112
3.2 Fees and other cost considerations	112
4. Application filing procedures in specific jurisdictions	114
4.1 Filing with the United States Patent and Trademark Office (USPTO)	114
4.2 Filing with the European Patent Office (EPO)	115
4.3 Filing under the Patent Cooperation Treaty (PCT)	115

**Module IX
Prosecuting patent
applications 120**

1. Responding to office actions	121
2. Drafting responses	122
3. Amendments	123
3.1 Principle and basic requirement	123
3.2 Determining original disclosure and new matter	123
3.3 Broadening claims and adding claims	124
4. Getting claims allowed	125
4.1 Interview	125
4.2 Responding to a second office action	125
4.3 Final office action	126
4.4 Deadlines	126
4.5 Appeal	126
4.6 Divisional applications, continuation applications and continuation-in-part applications	127
5. Opposition proceedings	127
6. Issuance of the patent	127

**Module X
Patent strategy 129**

1. Offensive blocking patenting to mount attacks on competitors	131
2. Defensive patenting to protect against infringement actions	132
3. Design-around techniques	132

**Module XI
Organizing, educating and
motivating the technical team 134**

1. Training management personnel and marketing personnel to understand the significance of patents and portfolio building	135
2. Training scientists/technologists to understand what might be patentable and who might be a co-inventor, and to prepare invention disclosures	137
3. Setting up an in-house patent review committee to periodically review invention disclosures and make patenting recommendations	138
4. Inventor incentive programs to encourage inventors to invent and report	138
5. Professional ethics	139
